

TT TrainerTM

Real-time Modeling without Risk

Accuracy. Stability. Speed.

These are the hallmarks of the X_TRADER platform from Trading Technologies (TT).

TT pioneered the development of electronic derivatives trading. Loaded with innovative features, supremely reliable and reflex-fast, TT's X_TRADER platform is the front-end screen of choice for professional derivatives traders around the world.

TT provides connectivity to the primary derivatives exchanges through the world's major global clearing firms. As a futures trader, you can use the X_TRADER platform to trade derivatives in virtually any market.

Some of the world's most successful traders depend on X_TRADER to manage their trades. Do they know something you don't know?

See what you've been missing. Contact a Trading Technologies representative and harness the extreme performance of X_TRADER.

All Real – Except for P&L

Whether developing new trading models or assessing the skills of a new trader, firms running TT Trainer can now get as close to live trading as possible without risking capital.

TT Trainer is not a canned simulation. The exchanges are real. The products are real. Price feeds and market depth are real - and live within milliseconds. You can even run your preferred analytical tools and respond as if real money was on the line.

- React to real markets without exposure
- Learn using X_TRADER, the world's fastest front-end trading screen
- Get near real-time market playback – including depth, with time accuracy up to a millisecond
- Create your own library of market activity by accessing recorded data
- Synchronize multiple markets or contracts
- Loop back for continuous play, pause, rewind and fast forward
- Monitor variable speed market playback, with price updates from .1 to 10 seconds
- Assure all contracts are saved with smart recorder
- Automatically configure record and playback starts
- Simulate network delays and exchange slowdowns

TT TrainerTM FAQs:

Q: What is TT Trainer?

A: TT Trainer is a training tool that allows you to simulate live exchange trading on the X_TRADER platform. The TT Trainer software records live market price feeds from the exchange and plays them back within milliseconds. With TT Trainer, you can train new traders or test trading strategies in a simulated environment with real exchange data – but without risking real money.

Q: What do I need to use TT Trainer?

A: As a trader, you need an X_TRADER license, which you can get through a clearing firm. You will be able to log into the TT Sim server to see and trade the prices. If you are a clearing firm, bank or other institution that wants to offer TT Trainer to your customers or traders, you need the TT Trainer software and a TT Sim server.

Q: What is the difference between the TT Trainer software and the TT Sim server?

A: The TT Trainer software records live exchange data and plays back the pricing information. TT Trainer users can loop the recorded data for continuous playback, or they can pause, rewind or fast-forward it. TT Trainer also offers variable speed market playback, with user-selectable price updates from .1 to 10 seconds. The TT Sim server matches the orders coming from X_TRADER with the recorded exchange data from TT Trainer and issues fills back to X_TRADER.

Q: Can I use TT Trainer without installing a TT Sim server?

A: Yes. If you do not want to install a TT Sim server or if your clearing firm does not have a TT Sim server, you can access one on an ASP basis through TNT. Users who choose to access TT Trainer through TNT have access to the Mini DOW, eMini and Mini NASDAQ products.

Q: What are the advantages and disadvantages of using TNT?

A: TNT lets you use TT Trainer without installing additional server equipment. You log into a TT Sim server that is located at TT's network operations center. However, TNT only provides access to the DOW, eMini, and NQ products. Users who want to simulate trading of other products need to install a TT Sim server in order to access and record those products.
